Message from the Board

The last year was a busy one indeed! Atfaluna worked towards strengthening the way it works as an organization, thus becoming better able to fulfill its mission and vision. We benefited greatly from the restructuring and planning processes carried out in 2020, which helped institutionalize our operations. Communication channels are more refined, the various committees' goals and work plans are better defined, as are the roles and responsibilities of their different members.

Moreover, we were able to attract into our different committees excellent new volunteers with a variety of specialized backgrounds, and our pool of "occasional" volunteers has continued to expand to support our growing activities.

Partner agreements were formalized with high-caliber partner organizations, and fundraising capacities were elevated with continuous growth. More public awareness of Atfaluna's brand was created among various stakeholders using primarily digital media. Our internal-operations Web App is finally in place and will facilitate the monitoring and evaluation of every treated child's entire treatment journey, with assessments of our impact on our children's quality of life at the end of their journeys with us, as well as a more systematic method of keeping our supporters updated on their beneficiaries' progress.

In the following pages you can find all the details of our year's achievements. We hope that you will enjoy perusing this report, and we welcome any suggestions you might have to help us continue growing and reaching more and more of our society's neediest children.

About Atfaluna

About Attfaluna

In 2015, a group of volunteers working in various professions came together and founded this non-profit organization with the goal of helping needy children, regardless of their origin, in receiving the quality medical care that they deserve yet their families cannot afford. Together, with your support and the help of a large and growing group of volunteers, we have since been able to achieve that goal successfully for thousands of children, helping assure not only their health but also their dignity and future.

Our Objective

Helping needy children, regardless of their origin, in receiving the quality medical care that they deserve yet their families cannot afford, thus improving their health and giving them a brighter future.

How We Work

Socio-Economic Assessment

A child's story begins with our Senior Operations Manager, who runs a detailed initial socio-economic assessment to confirm true need.

Medical Committee Evaluation

The file then moves rapidly to the next phase, which is the Medical Committee's evaluation, and if the case fulfills the medical selection criteria the child is referred for evaluation and treatment by one of our volunteer specialists. The specialists we work with are among Jordan's best, as we strongly believe our children should receive the same level of care accessible to any more fortunate child.

Fundraising

Once the evaluating physician draws up the child's treatment plan, it is our fundraising committee's turn to raise the funds needed to make that plan a reality.

Treatment Journey

Then the treatment journey begins, and it does not end before our child's treatment and follow up have been fully completed and the child's life is as free as can be of pain and disability.

Medical Committee's Selection Method

Atfaluna aims to provide medical care for every child who needs it; yet to optimize the utilization of our finite resources our Medical Committee uses an algorithm to help us prioritize our patients in an equitable manner. This algorithm has two main stages:

Initial Screening Criteria

Age 18 years or younger

Non-malignant, non-chronic condition

Fulfillment of socio-economic pre-screening criteria

Absence of coverage by any insurance company or other NGO, unless:
- Required treatment is unavailable in Jordan
- Condition is urgent

Weighted Selection Criteria

Threat to life

Impact on child's quality of life

Urgency of treatment

Complication rate

The score for each case is calculated according to the above weighted items, and if the minimum total is attained, the case is selected, and the child's treatment journey begins.

Who We Are

Atfaluna's paid employees consist of our Senior Operations Manager, **Ms. Manal Shreiteh**, along with our Junior Social Worker, **Sarah Taha**, and our Accounting & Administrative Officer, **Ms. Muna Freij**.

Besides the critical roles played by our above salaried team, all the other tasks performed in the day-to-day planning and execution of our work is done by volunteers. Our "core volunteers" group is composed of professionals with their own full-time jobs who work tirelessly and pro bono as part of the below-mentioned committees, together with a larger pool of "occasional volunteers" who eagerly step up to help out whenever help is required.

Atfaluna's strategy is developed, and its implementation is followed up, by the Management Board, which is headed by our Planning Officer, **Eng. Muna Budairi**. As for the preservation of Atfaluna's core values and mission, that is the responsibility of our Board of Trustees - **Dr. Ghassan Alami**, **Ms. Bana Fahmawi**, **Ms. Suhair Fahmawi**, **Eng. Safa Jarrar**, **Mr. Fadi Sunna'** and **Eng. Maisa Thweib**.

OUR COMMITTEES

MEDICAL & PATIENT AFFAIRS

Head

Eng. Maisa Thweib

(Development Management & Evaluation Consultant)

Members

Dr. Ghassan Alami (Orthopedic Surgeon)

Dr. Aya Banat (Pediatrician)

Dr. Samah Jbour (Pediatric Nephrologist)

Ms. Rania Malhas (Pharmacist)

Ms. Manal Shreiteh (Senior Operations Manager)

Mr. Fadi Sunna' (Pharmacist, Entrepreneur)

Once the socio-economic screening is performed by our Senior Operations Manager, our job is to assess the received cases on a medical level, determine whether we can help them and what tests and consultations they will need, then continuously follow up on their treatment journey.

VOLUNTEERS' MANAGEMENT

Head

Mrs. Bana Fahmawi

Volunteers play many roles within our operations, including accompanying children to doctors' appointments, visiting them in hospitals, helping in our various awareness activities as well as with our financial, legal, and design needs. The role of this committee is to recruit and direct the efforts of our amazing volunteers.

ADMIN. & PARTNER AFFAIRS

Head

Mr. Fadi Sunna'

(Pharmacist, Entrepreneur)

Members

Ms. Ruba Jaber (Clinical Researcher)

Ms. Suhair Fahmawi (PR & Communication Consultant)

In addition to finding new partnerships and enhancing our existing ones, our role is to assure optimal transparency and compliance in all of Atfaluna's relationships with external entities.

FUNDRAISING

Head

Eng. Safa' Jarrar

(NGO Executive Manager)

Members

Eyad Younis (Manager of Tamam Foods)

Ms. Rana Ghusain (HR & Admin. Specialist)

Ms. Manar Ghusain (IT Quality Coordinator)

With each donation, regardless of the amount, another life is changed, and this committee works on increasing our received donations as well as keeping our generous donors informed of where their money goes.

COMMUNICATIONS

Head

Ms. Lama Al- Khatib

(Marketing Manager)

Members

Ms. Samar Said (Marketing Consultant)

Ms. Ruba Abu-Zughod (Arabic Content Creator)

Ms. Rania Sabbah

(Research, Evaluation, & Development Consultant)

Ms. Sayedah Al Far (Arabic Content Creator)

Mr. Anas Nazzal (E-Com. Development & Digital Marketing)

Ms. Rima Khalidi (Healthcare Consultant)

We take great pride in telling the stories of our children and recognizing all the different people in our community who supported them so that everyone sees the fruits of their generosity. This group of experts help us do that in the most effective ways possible.

ACCOUNTING

Head

Ms. Nada Al-Muhtadi

(Accounting & Finance Manager - Until April 2021)

Accounting is crucial for tracking all financial transactions and production of all our end-of-year reports.

OUR EXPERT VOLUNTEERS

None of the above work can be done so professionally and effectively without the expert help of the following professionals, to whom we are infinitely grateful:

Mr. Mohammed Abu-Hanieh (Auditor)

Majali and Partners Law Office

Represented by **Mr. Ghaith Rakan Almajali**
(Attorney & Managing Partner)

Mr. Oqba Faraj (Photographer & Videographer)

Mr. Omar Abdel Nabi (Film Director)

Mr. Ibrahim Al Baik (Producer and Editor)

Mr. Anas Shaheen (Products Photographer)

Mr. Yazeed Malkawi (Graphic Designer)

Ms. Mahasen Samhouri (Monitoring & Evaluation)

Success Stories

Success Stories from 2021

Abdelmajeed - 16y

A 16-year-old boy who suffered from a benign blood-vessel tumor that, despite not being malignant, had grown enough to block his right nasal passage and invade his nasal sinuses. This problem was treated in two stages, 24 hours apart, the first being an embolization to prevent the tumor from bleeding, performed by **Dr. Fareed Al-Adham**, and the second a complex resection of the tumor performed by **Dr. Rami Salman**. This procedure had a great impact on Abdelmajeed's life, as his tumor's growth in that sensitive location would have ended up compressing his optic nerve and perhaps his brain as well. Both doctors performed those procedures skillfully and waived their fees entirely, and the usual discount was given by **Abdali Hospital**, where the procedures were performed.

Rama - 14y

Rama is 14 years old, and she was born with a deficiency in the growth of the outer half of her leg and foot called "fibular hemimelia," which used to cause her pain and difficulty walking, thus greatly impacting her daily life. In 2021, Rama underwent a reconstructive surgery to lengthen her leg and straighten the deviation in her foot with the help of a Taylor Spatial Frame. Her surgeries took place at **Abdelhadi Hospital**, which provides discounts on all of our cases. Her complex treatment took several months and was provided by one of our amazing surgeons, who waived all of his professional fees. **While preferring to remain anonymous, this surgeon was Atfaluna's most prolific this year, performing 29 surgeries!**

Hasan - 6y

Hasan is a 6-year-old boy who had severe abdominal pain caused by a narrowed junction between one of his kidney's "pelvis" and its main drainage tube, the ureter. This problem was repaired by the skillful hands of **Dr. Ma'moun Zibdeh**, and his recovery was overseen by **Dr. Samah Jbour** at **Jordan Hospital**. Happily, Hasan is now in excellent condition, with no complications and no pain.

Hassan - 17y

Following treatment of his vocal-cord paralysis by **Dr. Osama Hamarneh**, Hassan's mother said: "Hassan's psychological status has improved! Before he used to exert himself to speak and people did not understand what he was saying. Now, after his operation, people can hear him clearly and he can communicate in a much better way."

Radwan - 12y

Radwan (12y) was treated by **Dr. Firas Zou'bi** at **Abdali Hospital** for a severe middle-ear infection. After his procedure, Dr. Zou'bi said: "Untreated, this problem could have cost Radwan his hearing and his facial movements. Thanks to Atfaluna's assistance, Radwan regained both his hearing and his smile!" A million thanks to you as well, Dr. Firas!

Special Campaigns

Certain medical problems are common, and we have found over the years that we can treat more children more effectively through “campaigns,” in which a system is set up with a number of volunteer centers and professionals, and during a defined time period patients are screened then given whatever treatment they are found to require.

Here are some numbers on the special campaigns we ran in 2021.

 Eye Campaign	
170 Number of children evaluated	20 Number of eye surgeries performed
11 Number of children given free eye glasses	8 Number of children who attended follow-up appointments with ophthalmologists
Centres	
Ishraq Eye Centre Shami Eye Centre Opticos Al Amad	
Ophthalmologists who supported Atfaluna in conducting the evaluation and performing the surgeries	
Dr. Arqam Qasem Dr. Mustafa Mehyar Dr. Mu'taz Gharaibeh Dr. Qasiem Nasser Dr. Oday Jumah Dr. Shaher Sa'diddeen	

 Scoliosis Campaign	
18 Number of children evaluated	6 Number of children who underwent scoliosis surgery
7 Number of performed scoliosis surgeries	3 Number of surgeries financially covered by PACES
Hospital	
Abdali Hospital	
Doctors	
Dr. Mohammad Armouti - Spine Surgery Dr. Mu'taz Jadaan – Spine Surgery Dr. Ehsan Jundi (assessment of lung functions) Pediatric Pulmonology & Immunology	
Medical Supplies Companies

Hospital

Jordan University Hospital

Doctors

Headed by **Dr. Umar Boston**
Dr. Iyad Ammouri – Pediatric Cardiology
Dr. Mahmoud Abu Abeeleh – Cardiac Surgery

Rashed - 3y

Rashed is a 3 year old born with a deformity in his heart's internal structure (one ventricle and a narrowed pulmonary valve). When we received his file, he was having recurrent bouts of blueness (cyanosis) and shortness of breath, and his parents had to take him repeatedly to the hospital due to low oxygen levels and lung infections, especially during the winter.

Several centers had declined operating on Rashed saying that his chances of survival were too low. But thankfully, after evaluating Rashed through a catheterization, our star cardiologist, **Dr. Eyad Ammouri** deemed that the risk of an open-heart surgery for him was actually not high. When the above-mentioned team came from the U.K., Rashed's case was selected to undergo a reconstructive surgery, which was performed with great success. And the next cold winter came and went with our little champion at home, away from hospitals, and growing happily like any other well child.

Adnan - 1.5y

Adnan – A 1.5-year-old boy born with an undescended testis, for which **Dr. Bilal Azzam** performed a corrective surgery, which he also did for 19 other patients as part of a medical campaign with Atfaluna. Many other children were evaluated during this campaign, and Dr. Bilal kindly waived a large part of his surgical fees. All the surgeries were performed at **The Islamic Hospital**, which regularly gives Atfaluna discounted rates.

A portrait of a young woman, Isra', wearing a light blue hijab and a grey patterned jacket over a pink turtleneck. She is smiling slightly and looking towards the camera. The portrait is set within a circular frame that has a red decorative element at the top left.

Isra' - 15y

Isra' is 15 and used to suffer from scoliosis, or deviation in the vertebral spine, which would have continued to worsen had a corrective surgery not been performed on her spine. And in order to allow her vertebrae to continue growing, Isra' was treated with a pioneering procedure called "posterior tethering" by **Dr. Mo'taz Jad'aan** and **Dr. Mohammad Armouti**, along with their assistant **Dr. Murad Zaher**. These surgeons along with the anesthesiologists involved in the case all waived their fees entirely, and the procedure was performed at **Abdali Hospital**, which gives us large discounts on a regular basis.

The expenses of this complex surgery were covered by **PACES Charity**, with whom Atfaluna signed a memorandum of understanding the year before. This primary surgery was followed by a second one for further correction and guidance of her spine's growth, and that one was covered by Atfaluna. Isra' is one of 6 patients for whom such unique surgeries were performed, all of whom have seen great improvements in their breathing, sleeping, and participation in various activities just like other well children.

Mo'taz - 13y

Mo'taz – 13 years, had a severe squint (strabismus) in his left eye as well as a suspicion of a droop in his eyelid. He was one of the 170 children evaluated during a campaign organized by Atfaluna with **Shami and Ishraq Eye Centers**.

Mo'taz` was referred to **Dr. Qaseem Nasser**, who evaluated him free of charge and found his eyelid to be normal. He was then referred to **Dr. Mustafa Mehyar**, who then performed a corrective surgery for his squint, waiving a large part of his fees. The procedure took place at **Farah Hospital**, which also usually gives us generous discounts. Mo'taz's eyesight and appearance are now normal, thanks to all who participated in this major successful campaign.

Financials

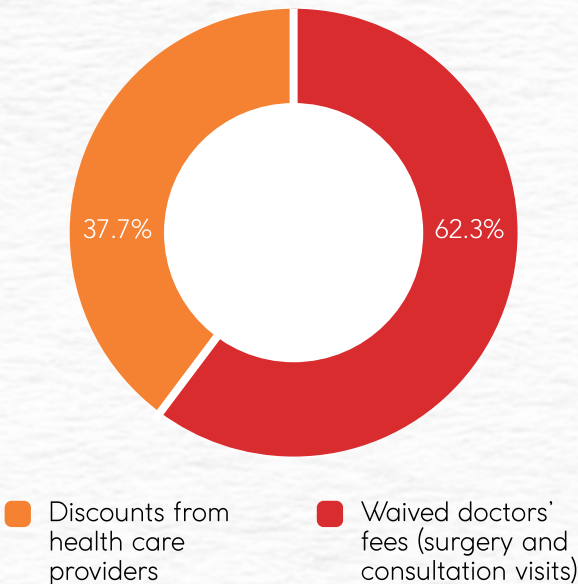

How Were Your Donations Spent in 2021?

This year's **administrative expenses** constituted **only 5.4%**! This is a very low figure by any standard and is due to our effort to keep as much of the work we do voluntary. Moreover, those 5.4% were covered by donors who have chosen to earmark their donations specifically for administrative expenses, thus allowing everyone else's donations to go entirely toward patient care.

With a few exceptions, our physicians usually waive their fees entirely, and all the hospitals and medical service providers (laboratory, diagnostic imaging, etc.) with whom we work give us generous discounts, saving us in 2021 a total of **JOD 329,975**. Naturally, this all multiplies the value of every donated dinar.

This year, we funded **207 surgeries** and other less-invasive interventions, as well as fitting and provision of numerous medical devices and equipment, and hundreds of wound-care and physiotherapy sessions.

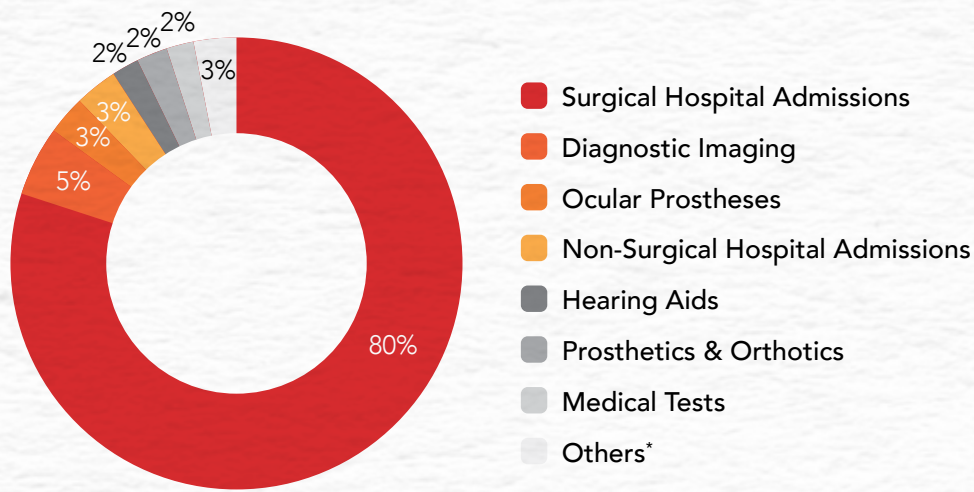

Sources of Achieved Savings

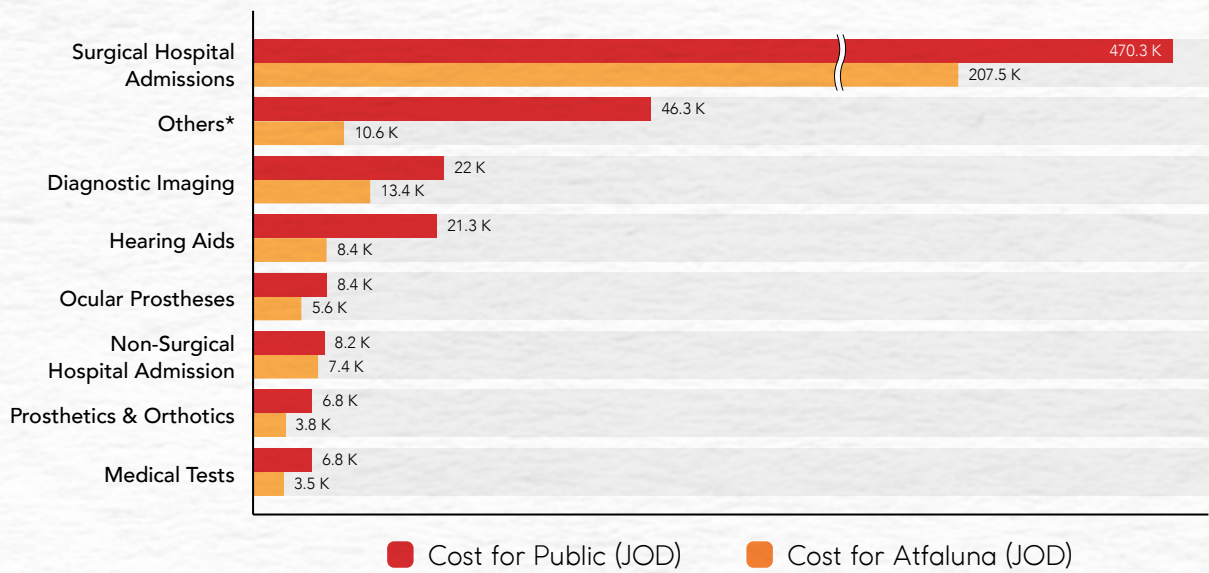

Cost & Savings Per Intervention Category

Intervention Type	Cost For The Public (JOD)	Cost For Atfaluna (JOD)	Savings (JOD)	Percent Saving	Percent of Spent Funds

Where Did Our Funds Come From?

In 2021, we raised **JOD 325,364**, which is a **41% increase** over last year's **JOD 231,435**. Below is the breakdown of this number according to donor category.

Source of Donations	Amount Donated (JOD)	Percent of Total Amount	Number of Donations	Average Size of Donation (JOD)
Individuals	232,717	71.09%	974	239
Foundations and Trusts	63,950	19.53%	6	10,658
Non-Profit Organizations	21,596	6.60%	3	7,199
Private Companies	9,100*	2.78%	6	1,517
Total	327,364*	100.00%	989	331

* Of those, JOD 2,000 were an in-kind donation from MedLabs covering some of our patients' laboratory test expenses.

Individuals

The majority (**72%**) of our donations came from our community of generous individual donors, who numbered **495 donors**. Of those, **29% (142 donors)** made multiple or repeated donations during the year, and **13% gave JOD 1,000 or more**.

As with all similar organizations, we always encourage our supporters to make regular donations, regardless of their size, as those are very helpful in our budgeting and planning. The year 2021 finally ushered in digital payment methods, which facilitated the donation process for many, and which make it possible to set up automatic transfers of a certain percentage of one's salary for those who wish to minimize the apparent burden of their donation.

An increasing number of individuals are learning about the “Fatwa” (#766 from 2010) declaring that donations to Atfaluna do qualify as “Zakaat.”

Foundations & Family Trusts

Foundations and family trusts were our second largest donor category, with an aggregate of **JOD 63,950** being given by the **Samih Darwazeh Foundation** (JOD 35,400), the **Basheer Alami Trust** (JOD 25,000), and the **Ghiath & Nadia Sukhtian Foundation** (JOD 3,550).

Non-Profit Organizations

The **JOD 21,596** received from non-profit organizations were donated by **SOS Children's Villages**, and **Life Makers**. Of note is that the funds received from the latter two organizations were earmarked for the treatment of patients sent to Atfaluna by those organizations themselves in order to benefit from our operational setup and provider network.

Private Companies

This year our private-company donations amounted to **JOD 9,100**, received from 6 entities. That includes a **JOD-2,000 in-kind donation** of medical tests from **MedLabs**, which is an annual gift we have received from MedLabs, along with a standing **50% discount** on all tests done at any of their branches, since our signing of a memorandum of understanding with MedLabs in 2019.

Of course, the discounts granted by our numerous other partner medical service providers also included many invaluable in-kind gifts, translating into thousands of dinars, as discussed in the preceding section.

Our Memorial Funds Program

Be it to honor a family member or friend, or to fund the treatment of a particular medical problem, we offer donors the option of setting up permanent funds to which they and others can contribute on a regular basis. Two such funds have so far been set up, one in memory of the late **Dr. Basheer Y. Alami**, and the other in memory of the late **Maha M. Al-Amir** (one of our founding members who passed away in 2021).

The aggregate amount deposited in those two funds this year was **JOD 92,635**.

Our Contributors

Featured Doctors of 2021

This year we would like to recognize the **ANESTHESIOLOGISTS** of all the hospitals at which our surgeons work. Those are the unknown soldiers toiling silently along with their assistants before, during, and after those complex procedures to make sure that our children get through them with no complications and with as little pain as possible.

Dr. Khawla Kalbanai
Dr. Rami Harb

Orthotics & Prosthetics

Ala'a Al Samman
Charl Stenger
Mohammad Aloqdeh
Omar Jamal

Physiotherapy

Eslam Qaddah
Shireen Banna
Thaer Abokhorma

Our Volunteers

Year after year, our dedicated volunteers have played a vital role in Aftaluna, and without them our organization would not have been able to grow and treat all those children over the years. Volunteers are not only the backbone of all our operations, but they also have an immense impact on the emotional well-being of our children and their families.

Despite their busy schedules and demanding jobs, our volunteers have still spared some time to help children in need. They are true role models, and we wish more and more people would volunteer with us every year as well as introduce their children to the rewards of charity work.

This year, we would like to give special thanks to these four individuals for the amazing work they did. You were so passionate, dedicated, and were always among the first to offer your help in all our activities – whether by accompanying our children to their appointments, visiting them after their surgeries, or lending us a helping hand in our many administrative chores.

A big thank you to all of you!

Bana Fahmawi
Volunteers Coordinator

Rahaf Hindieh
Patient Access Officer

Ghada Mohammad Mu'nes
Housewife

Dr Osama Nizar Al-Bairouty
General Practitioner

Zaina Ayed Dawood
Social Worker

Our Supporting Hospitals & Businesses

Atfaluna has so far collaborated with 65 different hospitals and other supportive medical service providers. The following entities were those to whom we are the most grateful in 2021, appearing in order of the magnitude of their contributions.

مستشفى العبدلي
ABDALI HOSPITAL
Member of Clemenceau Network

Petra Company

PhenoMed

Palm Corporation for Medical Supplies

Panorama for Medical Supplies

RAFT for Medical Supplies and Prosthetics

RayOne

Science & Development Company Middle East

Shami Eye Centre

A Look Into The Future

“That children are provided with quality health care in diagnosis, treatment, and recovery; are served in a timely manner; and are treated by the most appropriate medical providers (Atfaluna or other partners/NGOs) in a dignified manner.”

For 2022 we hope to continue strengthening the functioning of our organization in order to fulfill the specific goals and outcomes our committees have set for themselves:

1. Recruit more leading medical professionals into our pool of volunteers, with focus on our deficient medical specialties, and set up a healthcare partner's management system (doctors, labs, pharmacies, hospital, other healthcare providers) and finalize partner agreements with them.
2. Increasing and formalizing the number of agreements and memoranda of understanding with high-caliber partner organizations.
3. Set up the Monitoring and evaluation system to facilitate the Assessment of the children's journey during treatment and impact of treatment on child's future.
4. Implement the out-reach strategy designed for better targeting geographically the neediest children.
5. Ensuring well-organized support for our increasing number of patients and MSPs from our growing pool of volunteers.
6. Strengthen corporate fundraising and diversified payment methods, and diversified fundraising scales (from individual case announcements to campaigns for groups of similar cases).
7. Continue improving detailed updates to donors and demonstrating the specific impact and value of their donations.

More children have access to sustained medical care through ensuring a sustainable support from volunteers, HCP, donors and partners.

The neediest children are defined through well-defined selection criteria and targeted through a comprehensive out-reach strategy to different dis-advantaged communities.

8. Continue on strengthening public awareness of the Atfaluna brand across all stakeholders, building a corporate face for the brand, and nurturing gratitude communication.
9. Focus on working with all media types and levels (digital and traditional) and participating in public events and promotional activities.
10. Continue strengthening the different committees and institutionalizing their operations with focus on drafting systems and procedures for daily operations for the finance and Admin committees.

With your support, we hope to keep growing Atfaluna's work and impact, aspiring to leave no child untreated.

Muna Budairi
Planning Officer

How to Donate to Atfaluna

You can be part of changing a child's life - every amount you donate, small or large, makes a difference.

Direct bank deposit

You can also contact Atfaluna's Fundraising Committee via either facebook Messenger or WhatsApp on:

0777609427

Your donation can also be given as a gift.

We are happy to send you a physical or an electronic greeting card, which you can send to that lucky person telling him/her that they have made a donation through you.

How to Volunteer with Atfaluna

Donation to and spreading the word about Atfaluna aren't the only ways to support our cause; you can also help us by volunteering your time and expertise in our daily operations.

Atfaluna's work relies heavily on voluntary work and our model of synergizing efforts, expertise, and good will is what distinguishes us. Whether a medical or para-medical professional or an expert in any other discipline, **you can volunteer with us whenever your time allows or on a periodic basis.** You can also contribute by joining our pool of supporting volunteers who either offer their time to help us with administrative and logistical tasks or accompany our children to their doctors' appointments or visit them at the hospital providing them with invaluable support, both practical and moral.

You can be part of helping children receive the medical care they need to lead healthy and pain-free lives. Simply contact us through social media and let us know how you wish to help.
